DOCUMENT ACCESS – INTEGRACE A ARCHIVACE DAT VE VIRTUÁLNÍ SLOŽCE

- Jednoduché zobrazení dat business uživateli
- V kontextu celého business procesu a online dat
- Přímý přístup k přílohám
- Online data = data v SAP databázi
- Offline data = archivovaná data mimo SAP databázi

BRAVA! ZÁKLADNÍ POHLED

The screenshot shows a document viewer interface for a DOCX file named 'Martin Metal - 17.02.2016'. The document content is as follows:

ESWS - deployment and usage instructions | Single machine scenario

Stage 1 - Preparation

1. Install .NET framework 4.5.1 or later.
[e.g. from [\\godot\build_tools\MSWin32\MS_DOTNETFRAMEWORK\4.5.2](#)]
2. Copy 'ESWS - manual deployment.rar' to a local folder and extract the contents to a folder, let's name this folder as 'WebScan_Offline' for further reference.
3. Install different VC runtimes from 'WebScan_Offline\redist'.
There are two versions of 'VC90_Runtime', one is a pre-requisite for 'ISIS Virtual Device', other one is required by a dependency of 'ISIS Loader'.
4. Install 'ISIS Virtual Devices' from 'WebScan_Offline\Pixtools virtual devices Installer'.
5. Copy the contents of 'WebScan_Offline\AppData' folder to %APPDATA% folder.
6. Browse the path – "%APPDATA%/OpenText/ISIS Loader/bin". Execute 'RegisterDlls.cmd'.
7. Install 'OpenText ISIS Loader' using 'ISIS Loader.msi' from 'WebScan_Offline' folder. Confirm below checks -

Stage 2 - Check Point 1
Launch [services.msc](#) from Windows+R ('Run' window) and check if the 'OpenText Scan Spawner' service is present and running.

If this check **fails**, restart the environment and recheck. If the check still fails, contact us.

The right sidebar of the viewer shows a thumbnail of the document and a page indicator '1/2'.

BRAVA! DOPLNĚNÍ INFORMACÍ

ESWS - deployment and usage instructions | Single machine scenario

Stage 1 - Preparation

1. Install .NET framework 4.5.1 or later.
[e.g. from `\\godot\build_tools\MSWin32\MS_DOTNETFRAMEWORK\4.5.2`]
2. Copy 'ESWS - manual deployment.rar' to a local folder and extract the contents to a folder, let's name this folder as 'WebScan_Offline' for further reference.
3. Install different VC runtimes from 'WebScan_Offline\redist'.
There are two versions of 'VC90_Runtime', one is a pre-requisite for 'ISIS Virtual Device', other one is required by a dependency of 'ISIS Loader'.
4. Install 'ISIS Virtual Devices' from 'WebScan_Offline\Pixtools virtual devices Installer'.
5. Copy the contents of 'WebScan_Offline\AppData' folder to %APPDATA% folder.
6. Browse the path – "%APPDATA%\OpenText\ISIS Loader\bin". Execute 'RegisterDlls.cmd'.
7. Install 'OpenText ISIS Loader' using 'ISIS Loader.msi' from 'WebScan_Offline' folder. Confirm below checks -

Stage 2 - Check Point 1
Launch `services.msc` from Windows+R ('Run' window) and check if the 'OpenText Scan Spawner' service is present and running.

If this check **fails**, restart the environment and recheck. If the check still fails, contact us.

Stage 2 - Check Point 2
Check the 'Notification Area' (bottom right corner of desktop) for a tray icon that looks similar to ESC

BRAVA! PODPORA PUBLIKACE

The screenshot displays a software application window with a document titled "DOCX Martin Metal - 17.02.2016". The main content area shows a document with the following structure:

- ESWS - deployment and usage instructions | Single machine scenario**
- Stage 1 - Preparation**
- 1. Install .NET framework 4.5.1 or later.**
[e.g. from `\\godot\build_tools\MSWin32\MS_DOTNETFRAMEWORK\4.5.2`]
- 2. Copy 'ESWS - manual deployment.rar' to a local folder and extract the contents to a folder, let's name this folder as 'WebScan_Offline' for further reference.**
- 3. Install different VC runtimes from 'WebScan_Offline\redist'.**
There are two versions of 'VC90_Runtime', one is a pre-requisite for 'ISIS Virtual Device', other one is required by a dependency of 'ISIS Loader'.
- 4. Install 'ISIS Virtual Devices' from 'WebScan_Offline\Pixtools virtual devices Installer'.**
- 5. Copy the contents of 'WebScan_Offline\AppData' folder to %APPDATA% folder.**
- 6. Browse the path – "%APPDATA%\OpenText\ISIS Loader\bin". Execute 'RegisterDlls.cmd'.**
- 7. Install 'OpenText ISIS Loader' using 'ISIS Loader.msi' from 'WebScan_Offline' folder. Confirm below checks -**

The right sidebar contains a "Traditional Notes" section with the following content:

- Title
- Traditional Notes :
- Adding the first traditional note
- (c) RUPALIH 4.3.2016, 09:04
- This document is about ESWS - deployment and usage instructions
- (c) RUPALIH 4.3.2016, 09:04
- Append Traditional Notes :

The bottom status bar shows "Trad. Notes" and "UTF8". The bottom right corner has "Add" and "Close" buttons.

EXTENDED ECM FOR SAP - PŘÍKLAD

The screenshot displays the SAP Extended ECM interface. At the top, the header shows 'SAP Extended ECM' and the user 'N/A (otadmin@otds.admin)'. Below the header, a navigation bar includes 'Enterprise', 'Personal', and 'Tools'. The main content area is divided into several sections:

- Content Filter:** A sidebar on the left with a search bar and filters for 'Business Workspace View', 'Content Type', 'Folder', 'Document', 'E-mail Folder', 'Related Business Workspaces', and 'Shortcut'. It also shows the 'Owner' as 'Wyatt, Andy' and a 'Pulse From Here' section with 'All Users' and 'My Colleagues' tabs.
- Document List:** A central table listing documents with columns for 'Type', 'Name', 'Size', and 'Modified'. The list includes folders like 'Acceptance Documents', 'Agreements', 'Correspondence', 'Defect Reports', 'Management', 'Materials', 'Meetings', 'Others', 'Sourcing Projects', 'Statistics', 'Vendor Information', and 'Vendor Invoices'. A blue dot highlights the 'Correspondence' folder.
- Vendor Information:** A panel on the right titled 'AluCast (300)' showing vendor details: 'Vendor: 0000000300', 'Attributes' (Name: AluCast, Number: 300, Street: 900 Edison Ave., City: HILLSBOROUGH, Country: United States), 'Vendor KPIs' (Analyzed Period: 01.2005 - 12.2010; PO Value: 2816.00 EUR; Invoice Amount: 768.00 EUR; Deliveries: 11; GR Value: 2816.00 EUR; Mean del. time: 1 days), and 'Materials' (100-700 - Sheet metal ST37).

Yellow callout boxes provide additional context:

- Extended ECM prostor pro výrobce AluCast** (Extended ECM space for manufacturer AluCast) points to the 'AluCast (300)' vendor information panel.
- Standardní struktura SAP a NON-SAP dokumentů** (Standard SAP and NON-SAP document structure) points to the document list.
- SAP hlavní údaje o výrobci** (SAP main data about the manufacturer) points to the 'Attributes' section of the vendor information panel.
- KPI založená na datech SAP** (KPI based on SAP data) points to the 'Vendor KPIs' section of the vendor information panel.
- Seznam všech změn, např. nové dokumenty** (List of all changes, e.g., new documents) points to the document list.
- Odkaz do pracovního prostoru souvisejícího materiálů** (Link to the working space related to materials) points to the 'Materials' section of the vendor information panel.
